The Senate and White House Play us for Fools on Illegals

(c) DJGov.net 25 April 2006

It could have come from Hollywood Central Casting. Last week, our increasingly incompetent federal agents "swooped" down on plants in 26 states, belonging to IFCO, a US subsidiary of a Dutch firm.

Why they picked on a Dutch firm is unclear. Maybe it's because, the typical bureaucratic dullard doesn't know the difference between a Dane and a Dutchman. Perhaps it was an attempt at showing Islamists that we supported their riotous indignation and murder over a few innocuous Danish caricatures that used Mohammed as a metaphor for Islamic terrorism. In this way, they could suck up to Islamists and score some political points at the same time.

In any event, they detained 1,187 illegal immigrant invaders in a feigned attempt at "getting tough" on illegals and their employers.

About 10% were deported due to criminal records. The rest were released and told to show up in 45 days for deportation proceeding at Homeland Security's Immigration Services. Unknown to most Americans, this is standard procedure whenever Immigration employees are asked to get off their fat, corrupt, rumps and appear to do their jobs.

As is par for the course, Immigration computers were down and no records were inputted relative to the 1,000 invaders that we all know will show up in 45 days. But it didn't really matter, because the hidden impetus was to provide a bit of help for the Senate immigration bill and a poll boost to a very disappointing President Bush. "W," what the heck has happened to you? You've morphed into Ted Kennedy and you're not even from Massachusetts. Well, Connecticut is where the Bush family genetics lie and it adjoins the Bay State.

In 1995, a WASPY farm gal named Caryl Ball (maiden name) Leventhal secured a position at INS 26 Federal Plaza, New York City. INS was then a bureau of the US Department of Justice. It was also about the time Osama Bin Laden claimed to have gotten the idea to have planes crash into the World Trade Center.

For better or worse, Mrs. Leventhal became the first whistleblower to INS's selling green cards and approving visas without proper background checks. Her payoff was termination, threat of death, physical brutalization and threat of arrest and prosecution by the USDOJ if she didn't censor her website www.Justice-Denied.net, because it warned America of the looming terrorist menace.

Government never seems to change.

Better get used to it Americans. The power hungry elected officials and their federal bureaucracy mongrels are getting ready to sell out our country. The Senate bill will not only legalize 11 million illegals, but allow them to bring in another 20-30 million dependents. Along with multitudes waving Mexican flags, will come enough Islamist terrorists to turn the United States into a terror zone of fear and depravity. Never forget that 5 of the terrorists who almost destroyed the World Trade Center in 1993 were enabled through the amnesty of 1986.

We used to execute traitors. Now we call them federal employees and they're putting a hangman's noose around America.
